

A LANDSCAPE FOR BEES

A POUND OF HONEY = A DOLLAR OF PRODUCE

This graphic overlays data drawn from the 1870 Agricultural Census onto L.H. Evert's 1875 Map of Oxford Township. The circles represent the relative value of orchard products (red) and market garden produce (green) (in dollars) and honey (yellow) (in pounds) as reported by farmers in the census who are listed on the map. The census shows that Lorenzo Langstroth was by far Oxford Township's biggest producer of honey, with 1500 pounds reported. The Langstroth Cottage was located on the property of his brother-in law, A. B. Hull as listed on the map.
